

Please do not allow LPFM to take priority over FM translator service. I listen to K-Love through an FM translator in the Midland/Odessa Texas area and I cannot get the kind of programming K-Love offers on any other local radio station. They provide information on local events, offer free advertising for free admission events, and provide alerts from the national weather service as well as the "family friendly" music, news and features they broadcast daily. If K-Love was not available, this area would not have access to the positive programming I find only on this radio station. Local free admission events would not exist because admission would have to be charged since advertising is so expensive. I know many people in this area who listen exclusively to this particular station and feel that it would not be in the public interest to let low power FM take priority over the FM translator service.
